## Fees and costs

### **CONSUMER ADVISORY WARNING**

#### **DID YOU KNOW?**

**Small differences in both investment performance and fees and costs can have a substantial impact on your long term returns.**

**For example, total annual fees and costs of 2% of your account balance rather than 1% could reduce your final return by up to 20% over a 30 year period (for example, reduce it from \$100 000 to \$80 000).**

**You should consider whether features such as superior investment performance or the provision of better member services justify higher fees and costs.**

**You may be able to negotiate to pay lower administration fees.  
Ask the fund or your financial adviser.**

#### **TO FIND OUT MORE**

If you would like to find out more, or see the impact of the fees based on your own circumstances, the **Australian Securities and Investments Commission (ASIC)** website ([www.moneysmart.gov.au](http://www.moneysmart.gov.au)) has a managed investment fee calculator to help you check out different fee options.
